

Causes and Solutions for Hair Loss

CAUSES FOR HAIR LOSS:

Androgenetic alopecia – (Male /Female Pattern Baldness) - (40% of all adult males + thousands of women)

Androgen is a hormone -- (men & Women)

Causes hair follicle to shrink, shorten life span of hair – prevent new growth.

Other Causes of Hair Loss: Auto immune diseases, connective tissue diseases, exposure to toxic chemicals, radiation exposure, iron deficiency anemia, hormonal changes, thyroid disease, stress, drug interactions, environmental sensitivity, chemotherapy, fungal and bacterial infections.

Solutions for Hair Loss

BIO-MEDIC Hair Treatment System

a natural based cosmeceutical product line. (more than cosmetic without the side effects of pharmaceutical)

Formulated to block **androgens**

-INTERNAL supplement support

PERMIXON – inhibits the creation of DHT in our bodies, up to 78% effective. By reducing the amount of DHT you can affect the hair follicle and reduce hair loss as well you can slow it down or even stop it. Permixon is FDA cleared and can be prescribed without a prescription, for both men and women , with no side effects. A natural alternative to propecia and proscar.
